

PCM WORKSHOP

OUR EXPERIENCE CLOSE TO YOUR
PCP OPERATIONS

keep it moving 

Benefit from PCM's expertise and experience in PCP Systems close to your operations. Our workshops are already spread across 5 continents, and we are able to establish dedicated facilities close to your O&G field with the highest HSE industry standard.

- Ensure enough stock of downhole and surface equipment
- Maintain and repair any components of your PCP system
- Conduct failure Analysis just after work-over operation
- Bench test new and used PCP's prior to shipment to the field
- Increase In Country Value with local PCP assembly
- Test our elastomer with your fluid to make the best selection

› FAILURE ANALYSIS

Tools and procedures to identify and record P00H reasons, failed equipment, failure root cause through in depth analysis.

› PCP TEST BENCH

In remote areas, maximize equipment uptime and ROI with a simple and limited maintenance test bench design.

PCM

Artificial Lift Solutions

▶ LOCAL ASSEMBLY

Increase in-country value and supply chain flexibility/efficiency with local PCP assembly.

▶ LABORATORY

Select the best elastomer and rotor size according to compatibility test results with your fluid sample.

▶ MAINTENANCE & REPAIR

Maintenance/repair of all PCP systems: VSD, drivehead, BOP, torque anchor, insert system, etc.

▶ STOCK & INVENTORY

Stock of stators & rotors, driveheads, accessories and spare parts to ensure short time delivery on site.
